

AIR BLOWER BUNDLE

Instructions for Use

1. Securely mount the 240CFM blower. Wire blower motor to a 12v power source via a toggle switch to turn blower on/off (Yellow to positive, Black to ground). Route 3" air hose from intake side of the blower to fresh air source (ideally a NACA duct bringing fresh air in from outside of vehicle).
2. Install air filter screen on intake side of blower. Ensure edges of the air filter screen are securely aligned against the walls of the blower motor housing without interfering with the fan.
3. Place a single air filter centered over the air filter screen.
4. Insert black 3" air hose into 3" side of the Blower Filter Housing Fitting. Hose may be cut do desired length with a razor knife. If using a NACA duct, connect the opposite end of the 3" hose to it.
5. Attach Blower Filter Housing Fitting to blower motor housing by sliding 4" side over blower motor, air filter screen and filter. Use a cable tie to secure fitting where it overlaps with the blower motor housing.
6. Insert black 1.25" air hose into Blower Hose Fitting. Attach fitting to blower motor housing by sliding 4" side over exhaust side of blower motor. Use a cable tie to secure fitting where it overlaps with the blower motor housing.
7. If intsalling Air Blower Bundle with Viking Pro Cooler, skip #8 and #9 and proceed to Viking Pro section below.
8. Hose may be cut do desired length with a razor knife. Insert opposite end of 1.25" hose into black Angled Helmet Fitting.
9. Properly secure black Angled Helmet Fitting to helmet.

Instructions for Use with Viking Pro Coolers

1. Route 1.25" hose to one PVC fittings exiting the side of the Viking Pro Cooler and cut to length.
2. Attach Hose End Fitting to hose, one fitting on the cut hose and one fitting on one end of the excess hose. Push both Hose End Fittings onto tubes exiting the side of the Viking Pro Cooler.
3. Route excess hose to helmet. Cut to length if necessary.
4. Attach Angled Helmet fitting onto end of hose and push fitting onto helmet connection.
